

GAME CHANGER? PLANNING FOR JUST AND SUSTAINABLE URBAN REGIONS

AESOP ANNUAL CONGRESS
PARIS, JULY 8-12, 2024

SciencesPo

Welcome to Paris

and to the Urban School and the CEE of Sciences Po

Paris is now another example of the urban impact caused by significant events like the Olympics. However, it generally raises questions about all urban transformations intended to be virtuous but often proves counterproductive. Both great events and disasters teach us to adopt a rigorous and critical approach to significant events.

Moreover, this occasion provides an opportunity to ponder the interface between new and emerging themes that Tracks, Round tables and Special sessions offer from the various networks connecting AESOP researchers, institutions and countries of origin.

A new section introduced this year - French Cuisine - addresses the interface with researchers in France and the world of operational urban planning, which is in a constant dialogue with researchers in France

Lastly, it entails reflection on the ongoing significant challenges, transitions, and changes, as well as the wars and conflicts that we cannot ignore, even though we may not know how to address them.
