2015

- Proceedings of the Eastern Asia Society for Transportation Studies, Vol.10, 2015. During the time of colonization, modern town planning was influenced by colonizer s town planning style, and its function was mainly to serve the needs of the colonizer. The gridiron street pattern in Taiping town was established during colonization, and it is unfavorable for motor vehicle due to its design. How ever, in keeping up with newer towns, more development and attraction needs to be built. On the other hand, it is uncertain for Taiping town could contain such increase in traffic volume as a result of more development in future. This paper describe our pi lot study to suggest street pattern in determining travel behavior.
