YOUNG ACADEMICS NETWORK

Young Academics AESOP conference:

The AESOP Young Academics (YA) Network is an integral part of AESOP, designed for early-career researchers, including PhD students, Post-docs, and academics in the early stages of their careers. It provides an inclusive platform for the exchange of ideas, fostering collaboration and mutual support among emerging scholars. The network encourages high-quality academic output through open dialogue and constructive challenges.

Core aims:

- To make AESOP a stimulating and supportive environment for young academics.
- To enhance young academic participation in AESOP's organizational structure.

The YA Network positions itself as a community where tomorrow's academic leaders can thrive and grow in a collaborative environment.

YA Coordination Team (CT)
