WELCOME to Wpsc 2001

It is my great honor to join our local hosts, the College of Architecture and Urban Planning Tongji University, in welcoming you to Shanghai for the 2001 First World Planning Schools Congress. On many levels this promises to become an historical event.

Firstly, after the highly successful experience of ACSP-AESOP Joint Congresses in Oxford (1991) and Toronto (1996) this is the first World Congress of Planning Schools. For the first time members of planning schools from North and South America, Asia, Australia-New Zealand, Africa and Europe will meet. Four regional organizations (ANZAPS, ACSP, APSA, AESOP) took the initiative and became very supportive of the idea of a world congress. I am also particularly pleased with the moral and material support the World Congress got from our colleagues from ANPUR (Brazilian organization of Planning Institutes), the newly emerging Association of Latin-American Planning Schools and the embryo of what might become the African Planning School Organization.

Secondly, the overall theme of the congress 'Planning for cities in the 21st Century: Opportunities and Challenges' provides the opportunity to address a wide range of topics which will be faced by planning educators and professionals in the coming era.

Thirdly, this congress offers the possibility to promote international academic cooperation. A number of meetings of association presidents (or their representatives) is scheduled to reflect on (realistic) initiatives to enhance international cooperation and on what might happen next after the first world congress.

This will be a larger congress than many but we have all worked hard to ensure quality and consistency in the papers, coherence in the track sessions and two plenary sessions with outstanding speakers. We have tried to make this congress interactive between continents, countries, planning traditions and cultures and to encourage a focused exchange of views on a series of specialist subjects. As always these congresses are only possible through the work of many, many dedicated and creative volunteers.

We owe the greatest debt to the program committee, led by Michael Hibbard and Zhang Tingwei and well-supported by the co-chairs of the tracks, for each of which a thorough and conscientious peer-review process was organized with clear benefits for the quality of papers and presentations. A total of about 650 abstracts was reviewed.

I want to offer special thanks to my friends, the other members of the International Steering Committee, Michael Hibbard (ACSP), Anthony Yeh (APSA) and Steve Hamnett (ANZAPS); to the local organizing committee, energetically led by Professor Wu Zhiqiang; to the President of Tongji University for strongly backing the Congress; and to the many student volunteers who have collectively made this event possible. All have had to cope with a substantial additional workload generated by the Congress on top of their already onerous duties.

With all of you I look forward to an important exchange of ideas and the growth of cooperation and new friendships in this historic first World Planning Schools Congress.

WPSC 2001 Local Host – Tongji University

In the New Millennium, we have the great pleasure to welcome you, planning scholars from all continents of the world to gather in Shanghai, an international city of the world, for the 1st World Planning Schools Congress.

Over the centuries, the role of planner has been constantly modified to suit the needs and requirements of the age. Where the traditional methods are shown to be inadequate, new approaches are developed to take their places. And without exception, each redefinition enriches the connotation and denotation of the word 'Urban Planning', and therefore pushes for a higher degree of specialization. The past 20th century is definitely the most exemplary in this respect.

Today Urban planning specialist from all over the world are brought together to present new ideas and findings, to discuss on common interests and take part in exhibitions, as well as cultural events. That helps to enhance the relationship of all regions, and to formulate a better and more livable human habitat of the 21st century.

China has made great progress in its 'Reform and Opening', and Tongji University will also broaden all kinds of academic communications with peers from all countries. This congress sets a good example.

We are sure the 1st World Planning Schools Congress will be a great success, and wish you all a very fruitful and rewarding stay and enjoy the friendship in WPSC, as well as in Shanghai, China.

GENERAL INFORMATION

A. VENUE

Tongji University is located at No.1239 Siping road, Yangpu district, northeast of Shanghai.

B. LANGUAGE

The working language of the Congress is English. If there is any problem in communication, some staff members & volunteers will be available.

C. REGISTRATION

There are two kinds of Registration Desks. One is for participants who have registered already, and the other is for those who have not. If you have sent your registration form before and have received the confirmation from us, please come to the Registration Desks by alphabetic rank and sign in.

If you have not sent your registration form before, please come to the On the Spot Registration Desk and fill in your registration form.

The Registration Desks are located in the first floor of College of Architecture & Urban Planning from 1:00 p.m. to 10:00 p.m. on Tuesday, July 10 and from 8:00 a.m. to 10:00 p.m. on Thursday, July 11.

D. INFORMATION DESK

If you have any question about accommodation, conference program, post conference tour etc., there will be an Information desk next to the registration desks during regular registration hours. You can also get information from those volunteers in yellow T-shirt.

E. NAME TAGS

Participants are kindly requested to wear their name tags at all times during the Congress. Admittance to social events requires wearing the name tags.

F. CONGRESS NEWSLETTER

A newsletter of the 1st WPSC is published daily during the Main Congress. It contains session highlights, events of the day, schedule changes, and some timely information. Copies are available at the registration desks and information desk. If you have any announcement or information to be published, please contact our office.

G. TELEPHONE

Phone booths can be found everywhere in the campus. There are two kinds of telephones. The coin phone needs a ¥1 coin to use, and the IC-phone needs an IC-card to use. IC-cards can be bought from the souvenir desk and the post office.

H. INTERNET ROOM

We run an Internet Room equipped with accessibility to Internet, to provide convenient services. It opens on the second floor, College of Architecture & Urban Planning, from 8:00 a.m. to 12:00 a.m. and from 1:00 p.m. to 5:00 p.m.

I. MESSAGE BOARD

Message Board is near the entrance of the conference building where you can leave and pick-up personal messages. Your name will be shown in the signboard if you have messages.

J. EMERGENCY CALL

Some Emergency Calls are as follows:

110 for police, 119 for fire/rescue, and 120 for hospital services.

You can dial 65983419 or 65981429, the number of the WPSC office. We are ready to help you in 24 hours.

K. MEDICAL TREATMENT

There is a Medical Center in the venue. You can dial the number 65983419/65981429, and we will help you.

L. TRANSPORTATION FARE & TIME

Various means of transportation are available and the following information will help you commute from your hotel to the main venue of Tongji University, at minimum cost and with less difficulties.

Taxis are widely available, metered and easy to flag down. Travel by taxi is very reasonable and definitely the best way of getting around, occasional traffic jams notwithstanding. In general, Shanghai taxi drivers are very honest and enthusiastic. Usually the taxi drivers cannot speak English, but you can show them the following descriptions in Chinese we give to you following.

There are two kinds of buses, one is normal and the other is with air-conditioner with a mark of “*”.

You cannot pay the transportation fare in foreign currency.

You can get more information by asking Information Desk of your hotels (within our recommended list). There are free Shuttle Buses from Radisson and Peace Hotel to the venue during the congress.

N. CURRENCY AND CREDIT CARD

RMB is Chinese currency. The exchange rate changes with daily fluctuation. As of July 2001, US\$1 equals approximately ¥8.26 – 8.28. Foreign bank notes and travelers check can be cashed into RMB at hotels. Credit cards, e.g. VISA, MasterCard, American Express, Diners Club and JCB are all widely accepted. But foreign currency can only be used in duty-free shops.

O. BUSINESS HOURS

Public offices and banks are generally open from 9:00 to 17:00 on weekdays. Shopping hours are from 10:00 a.m. to 10:00 p.m.
There will be staffs in the Wpsc Office in 24 hours from 11-15 July.

P. ELECTRICITY

Electricity is generally supplied in 220 voltages.

Q. WEATHER FORECAST

It is hot and wet in July in Shanghai. The air temperature is usually beyond 30°C. And it seldom rains.

You can dial the number 112 to get the weather forecast when you are in Shanghai.

GUIDELINES

FOR PRESENTERS

1. Please arrive at the appropriate room at least five minutes before the session is due to start. If you are intending to use slides or other types of visual aids other than an overhead projector, you are suggested be in the appropriate venue even earlier.
2. Introduce yourself to the other presenters and the Chair. Each session will have an appointed chair that will be responsible for introducing the speakers, directing questions and keeping the session on time. If no Chair is present for whatever reason, then please nominate one of the groups to act as the time manager for the session.
3. You will be told before the session that how long your presentation can last. This will inevitably vary between sessions depending on the number of papers to be presented and whether there is a Discussant. Usually each speaker will be allowed a maximum of 15 to 20 minutes, which means that you will not be able to read your paper in full. You therefore need to structure your presentation around key points and arguments. You will not be permitted to speak longer than your allocated time, as this would be unfair to other presenters. The chair is instructed to intervene.
4. Within each session some time will be devoted to questions and discussion. There will be many informal opportunities to discuss your ideas with participants at the various social events so do not feel that you must cram everything into 15 minutes.
5. Speakers should note that:
 - a) The language of the Congress is English. You therefore need to be fluent in English if you are presenting a paper;
 - b) Each presentation venue is equipped with an overhead (transparency) projector. You are urged to use this for your presentation;
 - c) If you require any other equipment (such as a slide projector, laptop projector or video equipment), you must notify the WPSC Office at the email address or fax number by June 30, 2001 so the arrangements can be made.
6. When presenting your paper you must be conscious of the considerable variations that exist within the English language. Furthermore, for many of the participants in the Congress English may not be their first language. In making your presentation it is important to consider some basic issues:
 - a) Speak slowly and with great clarity, recognizing that individual country or regional accents may make you difficult to be understood by the audience.

b) Are you using terms that are culturally specific and may not be readily understood by individuals from other parts of the world. While it is clearly impossible to avoid using technical terms, there is also a responsibility to explain what they are. So please try to avoid using local colloquialisms, abbreviations and acronyms.

In summary, it is important that you present ideas in your paper in a manner that is accessible to a broad range of cultural background of those attending the Congress.

FOR CHAIRS

7. Chairs will be appointed to each session. It is their responsibility to manage the session, to introduce the authors, to allocate precise time slots for presenters, to remind presenters of the time they have left, and ensure that presenters do not over-run their time allocation. The chairs may need to be the chair's role to handle audience participation, either briefly between papers or at the end of the session.

FOR DISCUSSANTS

8. In some sessions, an individual may have been identified as a discussant. It is their role to provide a brief review and raise discussion points from the papers before opening up the discussion to the audience. The review should be brief enabling time for questions and responses. It will be the role of the discussant to handle the audience participation at the end of the track session.
9. If you have any query about your presentation or the program, please contact the Congress organizers in Shanghai.
10. We hope that everybody abides by these simple rules. By being disciplined in time management terms we thank you for helping to contribute to what we hope will be successful and enjoyable Congress.

CHAIRS INSTRUCTIONS

Within each session your role as chair is crucial in ensuring that each presenter has the same length of time to present their paper and that some time is left over for questions and discussion. Already the lead authors for each paper have been sent a set of guidelines with respect to paper presentation. This note is intended to provide you some guidance on how to manage the session for which you are responsible, though inevitably you will have to show some degree of flexibility. In essence your role will be to introduce the speakers to control the length of time they speak and to manage the questions.

In most sessions four or five papers will normally be presented, though obviously with the roundtable the number of discussants might be more. We believe it is important to try to establish some basic rules that everybody understands and works towards during the conference.

- 1) Please arrive at the appropriate session room at least five minutes before the appointed time.
- 2) Introduce yourself to the presenters. Based on the number of papers in the session and whether there is a Discussant who needs time to respond, inform presenters the

maximum time that they can use to present their paper. Each session is 1 hour and 45 minutes; there is no flexibility in that. Each session will have 4-5 presentations of 15-20 minutes, leaving 5-10 minutes for a discussant and 15-20 minutes for Q & A.

- 3) In introducing the session, which should be brief, tell the audience how many papers will be presented; how long each presentation will take; when there will be the opportunity for questions and answer; and whether there are copies of individual papers available and how they will be distributed.
- 4) For each paper introduce the author and title of the paper.
- 5) You will have a clock to help the presenter to manage the timing of their presentation.
- 6) There will be a room master in every session room who is responsible for the presentation facilities and prepare to help you at any time.

We strongly recommend that as the Chair of the session and if you are to present your paper in this session, you present your paper at the end of the session, even if this means altering the formal program slightly. It gives you an additional incentive to manage the program more efficiently.

When presenting your paper ask one of the other presenters to manage your time using the clock outlined above.

- 7) In managing the questions and answers session please ask questioners to identify themselves and to keep their comments as short as possible to allow the presenters to respond in full.
- 8) Please ensure the session finish on time. With over 150 sessions programmed this is clearly going to be a hectic Congress. Sessions that over run will affect other tracks later in the day.

Finally thank you for acting as a Chair and helping to make this Congress as successful as we hope.

DISCUSSANTS GUIDELINES

Discussants should try to 'add value' to the session by doing one or more of the following:

- a) show connections or disagreements among papers;
- b) point out implications of the set of papers that may not be obvious from individual papers themselves; or
- c) identify unusually meritorious or problematic aspects of individual papers,
- d) raise questions that are suggested by one or more of the papers which merit further discussion.

The tendency of some discussants to present their own analysis of the general issues, without meaningful reference to the papers presented in the panel should be avoided.

Discussants should be respectful of the time situation in the panel. If the paper presentations have run over in time, then it is appropriate for the discussant to cut his or her own comments short, or even eliminate them in favor of audience questions.

It is sensible for discussants to ask authors how they expect to fit a substantial paper into a 12-15 minute oral presentation. This may avoid offering a comment on an issue that is not part of the oral presentation.

Similarly, if the discussant wants to focus the session on a common theme running through overtly discrete papers, clue the authors to that synthetic intention well before the conference.

In general, discussants should try to avoid embarrassing paper authors by directly exposing failures to comply with the conference rules (e.g. "I only received this paper an hour ago,"), but this is not a firm rule. Certain truly egregious cases may well justify exception.

Finally, in the context of an international Congress, there are very different traditions of planning scholarship in various nations, making the matter of criticism more difficult. If the basis of the criticism is difference in national perspective or research tradition, then, to the possible degree, it should be identified as so, rather than presented as a fault of the individual work.
